

**MORE OF LIGHT!**

# Real advantages for you to see!

H4 +90% bulb

H7 +90% bulb

On the road, these Performance +90% bulbs provide up to 90% more light. This ensures greater safety by identifying obstacles and hazards earlier and quicker. This additional light / lighting also ensures better concentration and more relaxed driving.

The high-quality +90% bulb is not only distinguished by its modern design; its optimized illuminant and special coating technique provides maximum headlamp performance.

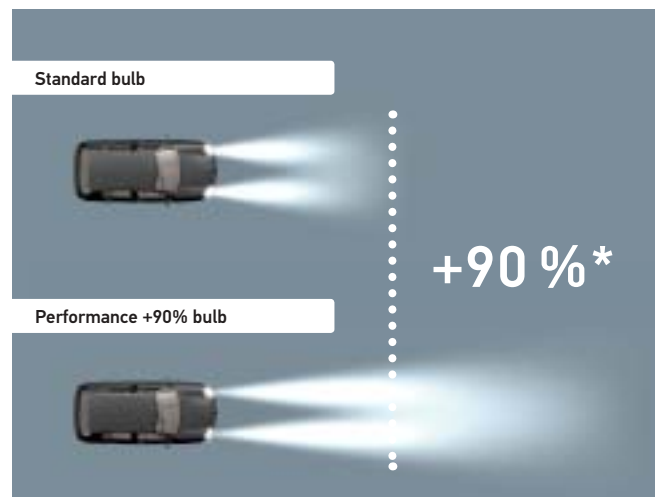

The H4 and H7 +90% bulbs also feature attractive silver caps and a special blue colour coating, giving the light another unique design element.

This combination of performance and quality relies on one of the most intense and powerful bulbs - providing higher visibility and driving safety.

## The advantages offered by Performance +90% bulbs include:

- More safety - up to 90% more light.
- Improved identification of hazards and obstacles.
- Optimized design:  
Silver caps for clear glass headlamps.
- Up to 90% more light / lighting is won through a smaller, but longer filament that is precisely positioned inside the glass body.
- Permitted in road traffic without restrictions.

\* compared to H4 standard bulbs

Find our new double packs, including two Performance +90% bulbs on the shelf. With one simple reach, you find the right bulbs for your vehicle. In the interest of driving safety, always replace both bulbs at the same time! Only this way, is the best light / lighting and high visibility ensured.

Our new double packs are distinguished by their special colour coding. This allows quicker orientation through our product range. It immediately identifies, which product is most efficient for the purpose.

The double packs in the blister packaging are delivered in a designed counter display, ensuring an attractive product presentation - and increased sales.
