S-Cam brake

Friction Material Release

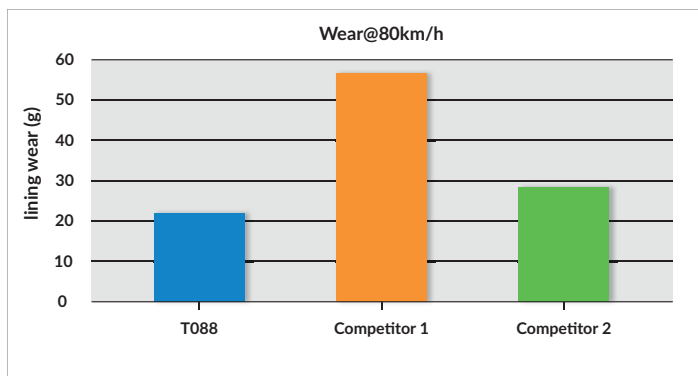

This aftermarket material has been specifically designed for s-cam foundation brakes.

Features and benefits

T088 is a fully moulded asbestos-free lining with a medium/high coefficient, developed for s-cam foundation brakes.

General Description

Textar T088 is an Aftermarket Material developed for truck and bus S-cam foundation brakes as a budget material to supplement the premium range. This material has been designed specifically for truck and bus applications and meets the high standards required by European ECE R-90 legislation. T088 provides a medium to high level of friction and is the top performer for wear in the budget material class.
