

Kit MCK1150 vs kit MCK1190

Marelli kits MCK1150 and MCK1190 are developed to allow the complete timing chain replacement on VAG cars equipped with FSI-TFSI type fuel engine, direct injection, 1800 and 2000 cc, from 88 kW to 155 kW, built between 2007 and 2017.

Both kits include 3 chains which commands respectively: **distribution**, **balancing countershafts** and **oil pump**.

The differences between the kits lay on the shape of two sliders.

MCK1150

The **kit MCK1150** allows the timing chain replacement of the first and second generation of the afore-mentioned engines which have been produced until 2012.

In this kit the first version of the sliders is included.

Beside the picture of the kit with the indication of OE codes.

MCK1190

The **kit MCK1190** instead allows the timing chain replacement of the third generation of the afore-mentioned engines which have been produced from 2013 on.

In this kit the second version of the sliders is included.
