Brush set with caliper hook

Comprising of three brushes and a 'S' hook, this kit has many uses. All three brushes have ergonomically-moulded, nylon-reinforced handles. The two brushes with brass bristles are suitable for cleaning electrical connections, glow plugs and spark plugs. The brush with steel bristles is suitable for removing brake dust, debris and corrosion when carrying out brake repairs - and can also be used in a variety of other ways.

The 'S' hook is coated to help prevent damage when in use and is suitable for supporting brake calipers; it helps to prevent stress to the flexible brake hose (or hoses) when carrying out brake service work.
