

febi 12244

to fit:

Fiat Punto, Lancia Y, Fiat Barchetta

EN

Rear axle mounting

- ✓ Fitted in only 5 minutes
- ✓ Quick and easy

You know the problem, don't you?!

The vulcanized front rubber mountings of the rear subframe fail after a certain mileage and cannot be replaced. febi offers a quick repair solution, which does not require replacing the complete rear subframe and therefore saves time and money:

The rubber mounting febi no. 12244 is an economical alternative to the replacement of the complete rear subframe. Just dismantle the two front screws of the rear subframe, install the rubber mountings 12244 and then tighten the bolts to ensure that the correct rear axle position is maintained. Rattling noises and an unsteady chassis feeling will disappear. And the best thing about it:

It can all be fitted within 5 minutes!
