TECHNICAL REPORT

Selection of oil pan gasket in
Opel Astra F X17DTL

PURPOSE

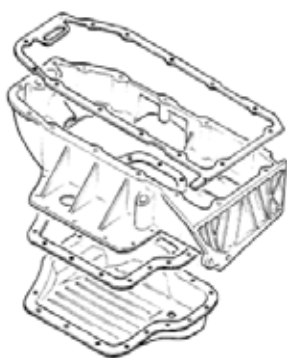

Inform our customers about the differences that presents the X17DTL engines in Opel Astra F and the correct selection of oil pan gasket.

DESCRIPTION

There is a cut-off for X17DTL engines that are distinguished mainly in the oil pan, and in the possession of air conditioning or not. Next, we will explain the main differences of this cut-off:

Engines with serial number < 14270979

(With Air Conditioning), the oil pan is composed of, the sub-oilpan and the oil pan itself, both made of aluminum alloy. In this case, the necessary gaskets are: 14065500 and 00749100, both being made of metal-elastomer.

+

Engines with serial number > 14270980

(Without Air Conditioning), the oil pan have no sub-oilpan and the gasket that is necessary is 14081800, being made of elastomer with metal screw passages for the bolts.
