This is a full synthetic lubricant based on high-quality PAO base oils. It offers advanced protection of all components, even when operating under high-speed/shock-load or low-speed/high-torque conditions. The SAE J2360 specification displays this lubricant's outstanding quality.

### APPLICATIONS

This OEM approved gear oil is recommended for all components of mechanical transmissions of HD vehicles. This is shown by the product's ZF specifications, which means that it can be used to service vehicles containing ZF driveline components like final drives or half-shafts. It is also designed to meet the SCANIA STO 2:0A FS and recent MAN, Volvo and MB driveline specifications.

### FEATURES

Advanced friction properties: vibration free power transfer  
Extremely high quality base oils: optimal oil performance in-between oil changes  
Improved oil stability: complete protection of critical parts, even under high-load conditions
