Stabiliser strut 818 0429 10

Extra adapter washer

Manufacture: Renault

Models: Twingo II (CN 0...)

Engines: D4F
D7F
K9K

Part No.: 818 0429 10

See parts catalog for current assignment

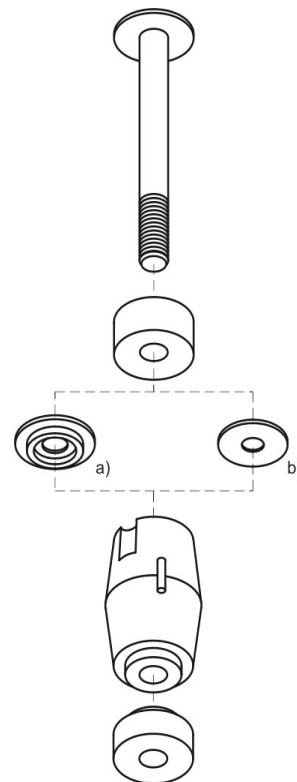

In contrast to the OE delivery scope, Schaeffler Automotive Aftermarket now supplies the stabiliser strut 818 0429 10 with an extra blue adapter washer.

Reason:

The transverse link in the Renault Twingo II may be equipped with a borehole diameter of 16mm or 18mm for the stabiliser strut depending on the construction year. The extra blue adapter washer allows the stabiliser strut 818 0429 10 to be used for both transverse link models.

Important note:

When exchanging the stabiliser struts, the joints/bushes of the wheel suspension should also be checked. Please refer to the usual media to establish the exact vehicle assignment e.g. TECDOC, online catalogue etc.

Assembly Information:

- Measure the boreholes for the stabiliser strut on the mounted transverse link
- Only use the white washer (b) for a diameter of 16mm
- Only use the blue washer (a) for a diameter of 18mm

Please observe the vehicle manufacturer specifications!
