

DON 7340

Main Vehicle Application

BPW
Fruehauf
Kässbohrer
Knott
Lohr
ROR
SAE
SAF
Trailor
York (Hendrickson)

General Description

DON 7340 is a budget Aftermarket material developed to meet the requirements of trailer brakes on a range of applications. This material has been designed to work with S-Cam foundation brakes on trailer applications and has been tested to the high standards of European ECE R-90 legislation. DON 7340 provides a good, stable level of friction over a range of speeds and temperatures, which also makes it one of our favoured budget materials in trailer applications.
