

STEER.

HOW TO IDENTIFY VAG GROUP STEERING RACKS ERRM1108, ERRM1109, ERRM1110

VAG OE Generation Steering Racks

The OE Generation 1 and 2 steering Racks have been discontinued by the OEM. This leaves the latest OE numbers which are for the Generation 3 steering rack only

The latest number will cross reference to ERRM1110. This could be incorrect for pre 2009 vehicles.

Shaftec have all three generation steering racks in the range.

Please see the information below to identify which steering rack is fitted to the vehicle:

Generation	Date From	Date To	Number of Rack Mounting Holes
1 (ERRM1108)	2003	2004	4
2 (ERRM1109)	2004	2009	4
3 (ERRM1110)	2009	Onwards	3

Please note, the original steering rack could have changed from the original manufacture date!

In order to retrofit the generation 3 steering rack to an earlier vehicle, please observe the following information:

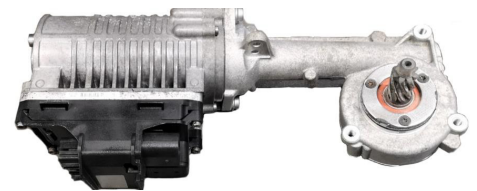

1. Should your vehicle be fitted with a Generation 1 steering rack, you will have to update:

- Wiring Harness
- Subframe

2. If you have a generation 2 steering rack, you will have to update:

- Wiring harness

3. For replacing generation 3 steering rack, no further parts must be replaced.
