

BMW

3 Series 1990-2000 (E36)

FBJ5434 Heavy Duty Version

Replacement heavy duty lower ball joint for BMW E36 models.

Following concerns about the service life surrounding this application, **FIRST LINE** has introduced a 'Heavy Duty' version of **FBJ5434** which features a solid type joint rather than an integral rubber cushion (pic a).

This item directly replaces the rubber cushioned type joint (pic b) which will be no longer available when current stocks are exhausted.

FIRST LINE recommends that the joints are always replaced in pairs to achieve optimum service life and maintain vehicle integrity.
